To Whom it May Concern:

The School District, needing a very large (6) six classroom unit moved at Fellsmere Elementary, contacted Kim Brownie & Sons Moving Engineers. Working us into their schedule and our budget, they went to work immediately to raise and move a 75 foot square, 85 ton building to it's new position.

During this move there were a few obstacles. The daily rains for approximately one week facilitated several loads of fill and sand, also new concrete and block piers were necessary. Of course we ran out of time along the way, but working long days and through an entire weekend, the building was placed and the area was cleaned up on time.

In short, I would highly recommend Brownie & Sons Moving Engineers as experienced professionals in heavy moving. They have a large array of special equipment for any situation and the expertise to perform all task necessary in this field.

Sincerely,
